Decorative Fin Structures

Sentech's decorative systems are designed to allow for maximum design flexibility. Our parametric modeling technology allows Sentech's team of designers and engineers to customize the fin systems' linear forms and create curvilinear forms across the exterior building envelope surfaces.

Sentech offers both custom aluminum and all-glass decorative fin systems, designed to resist the most extreme weather conditions. These fin systems can be designed to offer controlled shading and are available in an infinite variety of color and shape patterns.

-
- Fin Systems Materials & Basic Dimensions
 - Decorative glass fins up to 60' tall
 - Laminated glass fins used for redundancy and retention
 - Aluminum fins in modules up to 30' tall
 - 316 stainless steel hardware connection
