OVERHEAD SYSTEMS

Overhead Applications

Sentech Architectural Systems' overhead structural glass systems afford design flexibility and provide architects with a wide variety of solutions to enclose large overhead areas that require transparent solutions. Our overhead structural glass systems are designed to address the most challenging functional and aesthetic requirements, including organic-shaped enclosures and impact-resistant glazing.

Sentech offers metal and all-glass supported systems, using patch fitting, toggle or structural silicone glass connections. Our overhead glass systems are designed to be used with insulated-laminated or laminated glass.

System Spans

- Single fin all-glass systems: 60'
- Single fin impact-resistant all-glass system: 28'
- Single layer lattice structure vault system: 100'
